## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

- 1-32. (Cancelled).
- 33. (Original) A fastener for a plastic bag, comprising:
  - a male track including a male profile and a first fin portion; and
- a female track including a female profile and a second fin portion, said male and female profiles having complementary cross-sections, at least one of said fin portions made from a first resin which is prepared in the presence of a single site catalyst, said first resin having a polydispersity of from about 2 to about 3, a melt index of from about 0.2 to about 20 g/10 min., and a melt flow ratio of from about 12 to about 35, and a second resin which is a low density polyethylene, at least one of said fin portions comprising from about 5 to about 50 wt.% of said first resin, and from about 50 to about 95 wt.% of said second resin.
- 34. (Original) The fastener of Claim 33, wherein said first and second fin portions are attached.
- 35. (Original) The fastener of Claim 34, wherein said first and second fin portions have lower edges, said lower edges are attached to form a one time openable tamper evident feature.
- 36. (Original) The fastener of Claim 33, wherein said first resin is prepared in the presence of a metallocene catalyst.
- 37. (Original) The fastener of Claim 33, wherein each of said first and second fin portions comprises from about 5 to about 50 wt.% of said first resin, and from about 50 to about 95 wt.% of said second resin.

- 38. (Original) The fastener of Claim 37, wherein each of said first and second fin portions comprises from about 25 to about 50 wt.% of said first resin, and from about 50 to about 75 wt.% of said second resin.
- 39. (Original) The fastener of Claim 37, wherein each of said first and second fin portions comprises from about 5 to about 25 wt.% of said first resin, and from about 75 to about 95 wt.% of said second resin.
- 40. (Original) The fastener of Claim 33, wherein at least one of said first and second fin portions comprises from about 25 to about 50 wt.% of said first resin, and from about 50 to about 75 wt.% of said second resin.
- 41. (Original) The fastener of Claim 33, wherein at least one of said first and second fin portions comprises from about 5 to about 25 wt.% of said first resin, and from about 75 to about 95 wt.% of said second resin.
- 42. (Original) The fastener of Claim 41, wherein at least one of said first and second fin portions comprises from about 15 to about 25 wt.% of said first resin, and from about 75 to about 85 wt.% of said second resin.
- 43. (Original) The fastener of Claim 33, wherein at least one of said fin portions is prepared by coextruding the first resin and said second resin.
- 44. (Currently Amended) The fastener of Claim 33, wherein at least one of said fin portions comprises a blend of is prepared by blending the first resin and said second resin.
- 45. (Previously Presented) A fastener for a plastic bag, comprising: a male track including a male profile and a first fin portion; and

- a female track including a female profile and a second fin portion, said male and female profiles having complementary cross-sections, at least one of said fin portions made from a first resin selected from the group consisting of an ultra low density polyethylene, a very low density polyethylene, and a metallocene-catalyzed polyethylene, said first resin having a polydispersity of from about 1 to about 4, a melt index of from about 0.2 to about 20 g/10 min., and a melt flow ratio of from about 12 to about 35, and a second resin which is a low density polyethylene, at least one of said fin portions comprising from about 5 to about 50 wt.% of said first resin, and from about 50 to about 95 wt.% of said second resin.
- 46. (Original) The fastener of Claim 45, wherein said first and second fin portions are attached.
- 47. (Original) The fastener of Claim 46, wherein said first and second fin portions have lower edges, said lower edges are attached to form a one time openable tamper evident feature.
- 48. (Original) The fastener of Claim 45, wherein said first resin is an ultra low density polyethylene.
- 49. (Original) The fastener of Claim 45, wherein said first resin is a very low density polyethylene.
- 50. (Original) The fastener of Claim 45, wherein said first resin is a metallocene-catalyzed polyethylene.
- 51. (Original) The fastener of Claim 45, wherein said first resin has a polydispersity of from about 1.5 to about 4.
- 52. (Original) The fastener of Claim 45, wherein each of said first and second fin portions comprises from about 5 to about 50 wt.% of said first resin, and from about 50 to about 95 wt.% of said second resin.

- 53. (Original) The fastener of Claim 52, wherein each of said first and second fin portions comprises from about 25 to about 50 wt.% of said first resin, and from about 50 to about 75 wt.% of said second resin.
- 54. (Original) The fastener of Claim 52, wherein each of said first and second fin portions comprises from about 5 to about 25 wt.% of said first resin, and from about 75 to about 95 wt.% of said second resin.
- 55. (Original) The fastener of Claim 54, wherein each of said first and second fin portions comprises from about 15 to about 25 wt.% of said first resin, and from about 75 to about 85 wt.% of said second resin.
- 56. (Original) The fastener of Claim 45, wherein at least one of said first and second fin portions comprises from about 25 to about 50 wt.% of said first resin, and from about 50 to about 75 wt.% of said second resin.
- 57. (Original) The fastener of Claim 45, wherein at least one of said first and second fin portions comprises from about 5 to about 25 wt.% of said first resin, and from about 75 to about 95 wt.% of said second resin.
- 58. (Original) The fastener of Claim 57, wherein at least one of said first and second fin portions comprises from about 15 to about 25 wt.% of said first resin, and from about 75 to about 85 wt.% of said second resin.
- 59. (Original) The fastener of Claim 45, wherein at least one of said fin portions is prepared by coextruding the first resin and said second resin.
- 60. (Currently Amended) The fastener of Claim 45, wherein at least one of said fin portions comprises a blend of is prepared by blending the first resin and said second resin.

## 61-92. (Cancelled).

- 93. (Original) A fastener for a plastic bag, comprising:
  - a male track including a male profile and a first fin portion; and
- a female track including a female profile and a second fin portion, said male and female profiles having complementary cross-sections, at least one of said fin portions made from a first resin which is prepared in the presence of a single site catalyst, said first resin having a polydispersity of from about 2 to about 3, a melt index of from about 0.2 to about 20 g/10 min., and a melt flow ratio of from about 12 to about 35, and a second resin which is a low density polyethylene, at least one of said fin portions comprising from about 50 to 100 wt.% of said first resin, and from 0 to about 50 wt.% of said second resin.
- 94. (Original) The fastener of Claim 93, wherein said first and second fin portions are attached.
- 95. (Original) The fastener of Claim 94, wherein said first and second fin portions have lower edges, said lower edges are attached to form a one time openable tamper evident feature.
- 96. (Original) The fastener of Claim 93, wherein said first resin is prepared in the presence of a metallocene catalyst.
- 97. (Previously Presented) The fastener of Claim 93, wherein said first resin is a metallocene-catalyzed linear low density polyethylene.
- 98. (Original) The fastener of Claim 93, wherein at least one of said fin portions comprises from about 50 to about 90 wt.% of said first resin, and from about 10 to about 50 wt.% of said second resin.

- 99. (Original) The fastener of Claim 98, wherein at least one of said fin portions comprises from about 60 to about 85 wt.% of said first resin, and from about 15 to about 40 wt.% of said second resin.
- 100. (Original) The fastener of Claim 98, wherein at least one of the fin portions comprises from about 50 to about 75 wt.% of said first resin, and from about 25 to about 50 wt.% of said second resin.
- 101. (Previously Amended) The fastener of Claim 100, wherein at least one of the fin portions comprises from about 50 to about 60 wt.% of said first resin, and from about 40 to about 50 wt.% of said second resin.
- 102. (Original) The fastener of Claim 93, wherein each of the fin portions comprises from about 50 to 100 wt.% of said first resin, and from 0 to about 50 wt.% of said second resin.
- 103. (Original) The fastener of Claim 102, wherein each of the fin portions comprises from about 50 to about 90 wt.% of said first resin, and from about 10 to about 50 wt.% of said second resin.
- 104. (Original) The fastener of Claim 103, wherein each of the fin portions comprises from about 60 to about 85 wt.% of said first resin, and from about 15 to about 40 wt.% of said second resin.
- 105. (Original) The fastener of Claim 103, wherein each of the fin portions comprises from about 50 to about 75 wt.% of said first resin, and from about 25 to about 50 wt.% of said second resin.
- 106. (Previously Presented) The fastener of Claim 105, wherein each of the fin portions comprises from about 50 to about 60 wt.% of said first resin, and from about 40 to about 50 wt.% of said second resin.

- 107. (Original) The fastener of Claim 93, wherein at least one of said fin portions is prepared by coextruding the first resin and said second resin.
- 108. (Currently Amended) The fastener of Claim 93 wherein the fastener comprises said second resin and wherein at least one of said fin portions comprises a blend of is prepared by blending the first resin and said second resin.
- 109. (Previously Presented) A fastener for a plastic bag, comprising:
  - a male track including a male profile and a first fin portion; and
- a female track including a female profile and a second fin portion, said male and female profiles having complementary cross-sections, at least one of said fin portions made from a first resin selected from the group consisting of an ultra low density polyethylene, a very low density polyethylene, and a metallocene-catalyzed linear low density polyethylene, said first resin having a polydispersity of from about 1 to about 4, a melt index of from about 0.2 to about 20 g/10 min., and a melt flow ratio of from about 12 to about 35, and a second resin which is a low density polyethylene, at least one of said fins comprising from about 50 to about 90 wt.% of said first resin, and from about 10 to about 50 wt.% of said second resin.
- 110. (Original) The fastener of Claim 109, wherein said first and second fin portions are attached.
- 111. (Original) The fastener of Claim 110, wherein said first and second fin portions have lower edges, said lower edges are attached to form a one time openable tamper evident feature.
- 112. (Original) The fastener of Claim 109, wherein said first resin is an ultra low density polyethylene.
- 113. (Original) The fastener of Claim 109, wherein said first resin is a very low density polyethylene.

- 114. (Original) The fastener of Claim 109, wherein said first resin is a metallocene-catalyzed polyethylene.
- 115. (Original) The fastener of Claim 109 wherein said first resin has a polydispersity of from about 1.5 to about 4.
- 116. (Original) The fastener of Claim 109, wherein at least one of said first and second fin portions comprises from about 60 to about 85 wt.% of said first resin, and from about 15 to about 40 wt.% of said second resin.
- 117. (Original) The fastener of Claim 109, wherein at least one of said first and second fin portions comprises from about 50 to about 75 wt.% of said first resin, and from about 25 to about 50 wt.% of said second resin.
- 118. (Original) The fastener of Claim 117, wherein at least one of said first and second fin portions comprises from about 50 to about 60 wt.% of said first resin, and from about 40 to about 50 wt.% of said second resin.
- 119. (Original) The fastener of Claim 109, wherein each of said fin portions comprises from about 50 to about 90 wt.% of said first resin, and from about 10 to about 50 wt.% of said second resin.
- 120. (Original) The fastener of Claim 119, wherein each of the fin portions comprises from about 60 to about 85 wt.% of said first resin, and from about 15 to about 40 wt.% of said second resin.
- 121. (Original) The fastener of Claim 119, wherein each of the fin portions comprises from about 50 to about 75 wt.% of said first resin, and from about 25 to about 50 wt.% of said second resin.

- 122. (Original) The fastener of Claim 121, wherein each of said first and second fin portions comprises from about 50 to about 60 wt.% of said first resin, and from about 40 to about 50 wt.% of said second resin.
- 123. (Original) The fastener of Claim 109, wherein at least one of said fin portions is prepared by coextruding the first resin and said second resin.
- 124. (Currently Amended) The fastener of Claim 109, wherein at least one of said fin portions comprises a blend of is prepared by blending the first resin and said second resin.

125-133. (Cancelled)

- 134. (Original) A fastener for a plastic bag, comprising:
  - a male track including a male profile and a first fin portion; and
- a female track including a female profile and a second fin portion, said male and female profiles having complementary cross-sections, at least one of said fin portions is made from an ultra low density polyethylene, said first resin having a polydispersity of from about 1 to about 4, a melt index of from about 0.2 to about 20 g/10 min., and a melt flow ratio of from about 12 to about 35, and a second resin which is a low density polyethylene, at least one of said fin portions comprising from about 25 to about 75 wt.% of said first resin, and from about 25 to about 75 wt.% of said second resin.
- 135. (Original) The fastener of Claim 134, wherein said first and second fin portions are attached.
